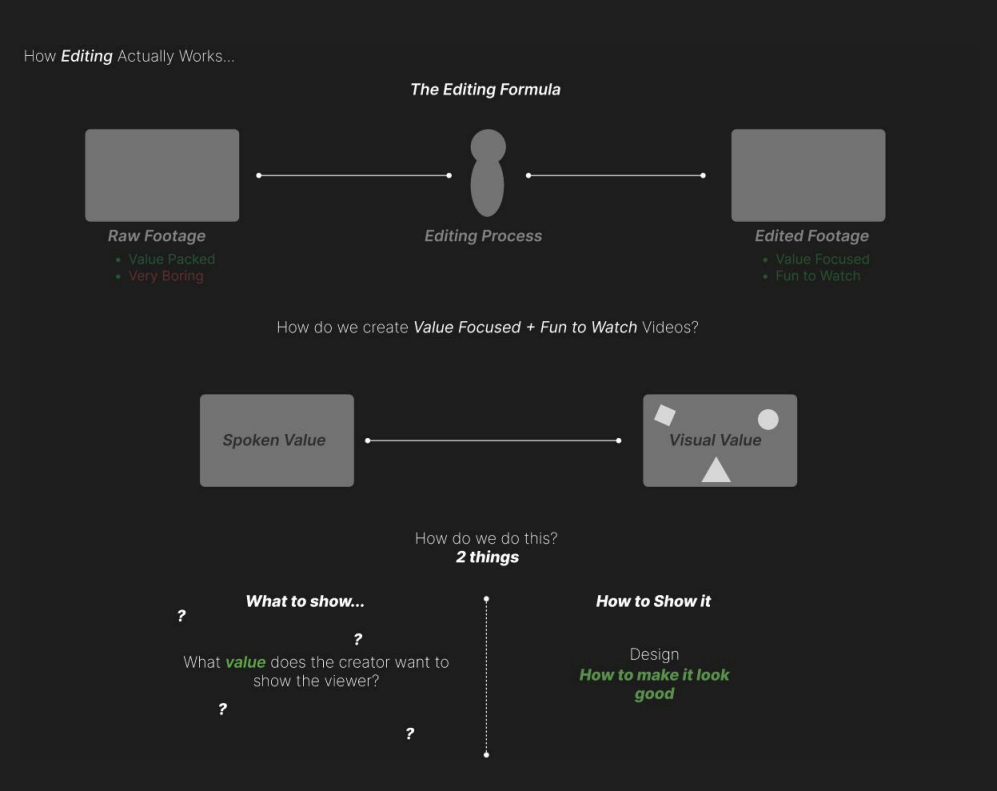
The Workflow Overview

How *Professional Editors* go from raw footage to stunning edits

1. Raw Footage

Client sends in raw footage



How *Editing* Actually Works...

The Editing Formula

Raw Footage
- Value Packed
- Very Boring

Editing Process

Edited Footage
- Value Focused
- Fun to Watch

How do we create *Value Focused + Fun to Watch* Videos?

Spoken Value

Visual Value

How do we do this?
2 things

What to show...

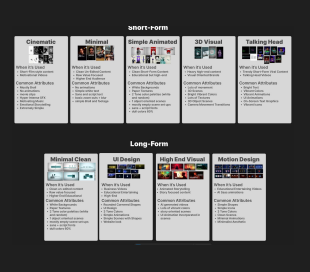
What ***value*** does the creator want to show the viewer?

How to Show it

Design
How to make it look good

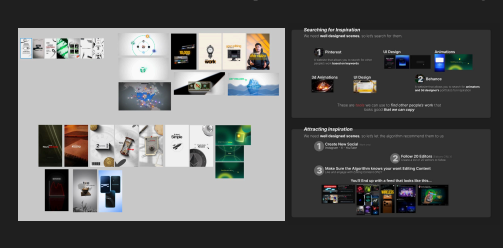
2. Pre-Editing Kit

What to prepare before diving into the edit

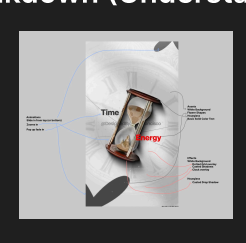


Choose Style

Collect Inspiration From Style



Create Breakdown (Understand Style)



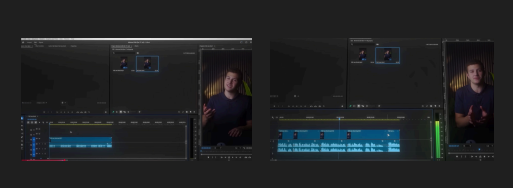
Begin Editing Process

Start Creating the Edit

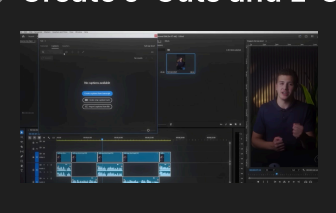
3. Cutting Phase

Remove Silences and Pace

Cut All Silences



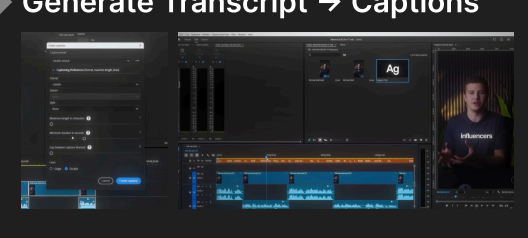
Create J-Cuts and L-Cuts



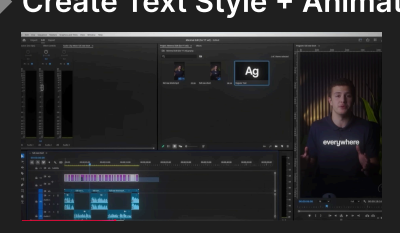
Optional: Subtitles

Generate and Create Subtitles

Generate Transcript → Captions



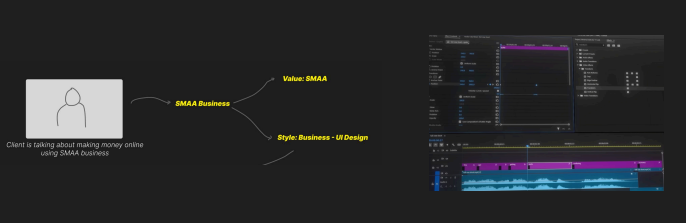
Create Text Style + Animations & Apply



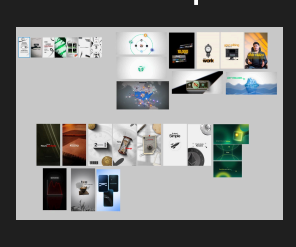
4. Editing Intro

Use the IBP process to plan out and create Intro animations

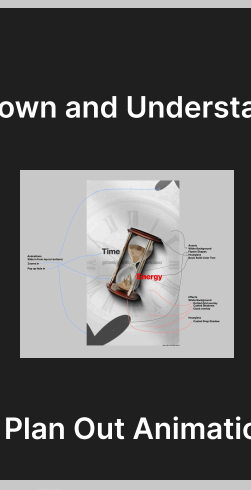
Analyze Intro + Find Value



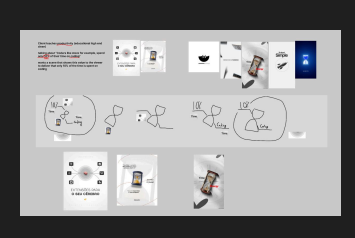
Collect Inspiration from client inspo board



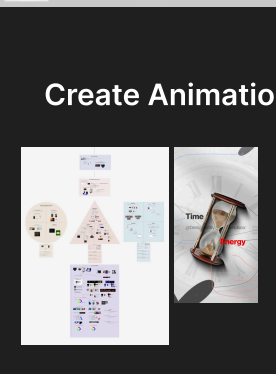
Remember Breakdown and Understand



Plan Out Animations

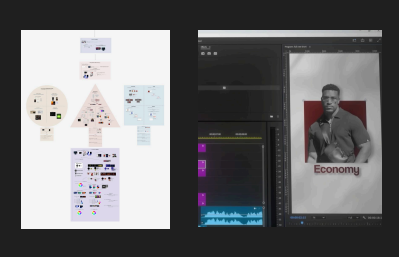


Create Animations



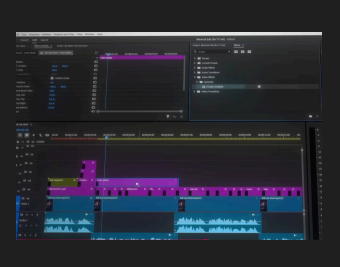
5. Animating Body

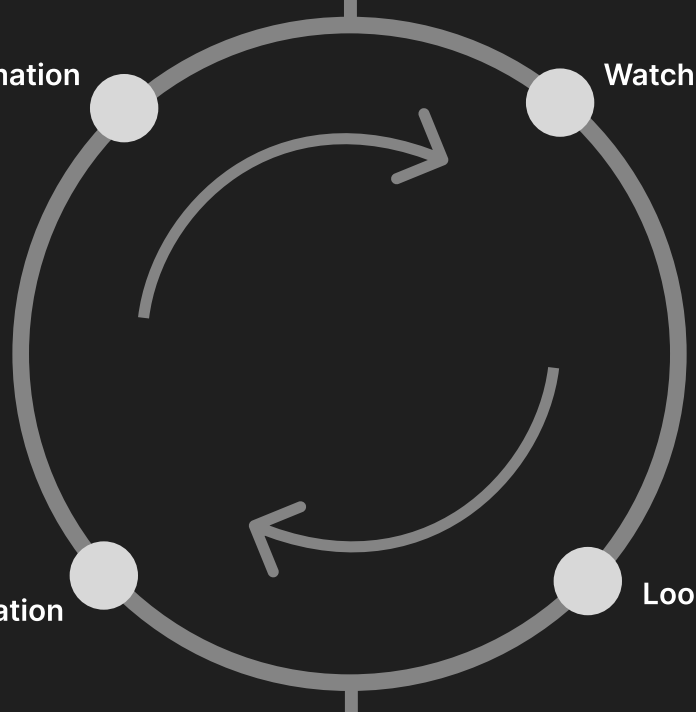
Create Animations for Body

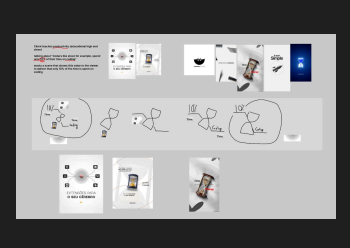


Create Animation

Watch + Find Value

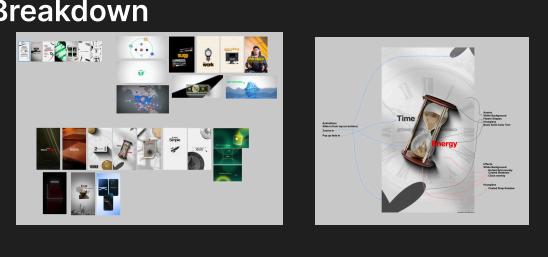






Plan Animation

Look at Inspo + Breakdown

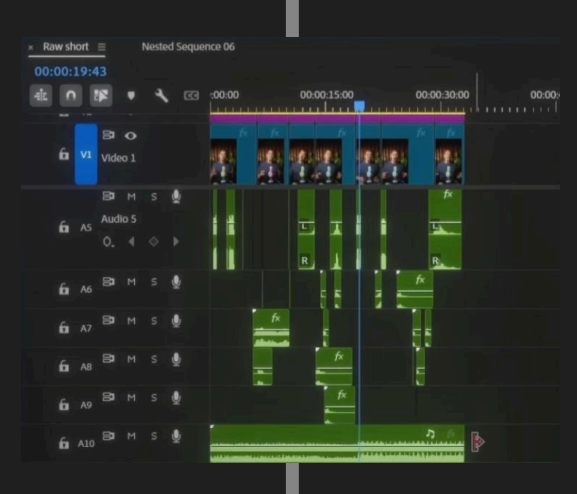


6. Sound Design

Bring animation to life using SFX

7. Finalize with Music

Add music to match the vibe of the video



8. Render and Revise

Send the client the complete video and wait for feedback
